

## Acceptance Criteria

Product: Runners Match

Team Name: Habt Inc.

11/18/2019

### Sprint 1:

User Story 1: As a user I want to be able to make an account for RunnersMatch so that I can have a presence on the website that I can return to and access regularly

Criteria:

User can navigate to sign up page from landing page

User can type in input for their account information

User can submit input data and said data will be stored in the firebase authentication database

User Story 2: As a user I want to be able to update my profile with my running information such as weekly mileage, average running pace, trail versus road running preference, and ideal qualities in a training partner

Criteria:

User can navigate to profile page

User can input data into text entry boxes associated with profile info

User can submit the data that they entered and data will be stored in a firebase real time database associated with their account

## Sprint 2:

User story 1: As a user I want to be able to search through other profiles on RunnersMatch and show my interest in training with profiles I find interest in

Criteria:

User should be able to Navigate to the home page when logged in

User should be able to search profiles based on criteria such as pace, mileage, etc.

User story 2: As a user I want RunnersMatch to show me possible training partners with similar goals

Criteria:

User should be able to Navigate to home page

User should be able to see suggestions for training partners displayed without having to search

## Sprint 3:

User Story 1: As a user I want to be able to post public events where I can meet other runners in large groups for runs and training sessions.

Criteria:

- User should be able to Navigate to an events tab
- User should be able to create a listing for a public event
- Users should be able to see listings for other events under the events tab

User Story 2: As a user I want to be able to sign up to post group events for people in my zip code so I can run with others

Criteria:

- Users should be able to Navigate to the events tab
- Users should be able to filter events by zip code
- Users should be able to restrict their event listings to listings by zip code

Sprint 4:

User story 1: As a user I want to be able to communicate and message runners that I am interested in to set up training sessions and meet ups

Criteria:

- Users should be able to click on profiles that they are interested in training with
- Users should be able to send messages to the profile they have selected
- Users should be able to see all past messages with the selected profile

User story 2: As a user I want to be able to leave feedback and a review of my experience of training with other users on the platform so that users can build a reputation on the platform as good or bad training partners.

Criteria:

- Users should be able to select a profile they have ran with
- Users should be able to leave a thumbs up or thumbs down rating
- Users should be able to see their own average rating
- Users should not be able to leave feedback on themselves

User story 3: As a user I want to get a google calendar notification for events that I signed up for so I can easily remember events.

Criteria:

- Users should be able to sign into the website with their google accounts
- Users should be able to allow notifications through the website
- Users should be notified in accordance with their preferences of events they signed up for

User story 4: As a user I want to be able to upload a photo to my profile so other users can get a better feel for who I am before meeting me in person.

Criteria:

- Users should be able to click on an upload image button on their profile page
- Users should be able to specify an image to upload from their computer or another source
- Users should be able to see the image that they have uploaded to their profile
- Users should be able to see other users' images
