

## Testing Details

I mainly tested the navigation and front end side of the website. I worked a lot on the stylistic look as well as things such as the Navigation bar and overall aesthetic. I tested taking different paths through the website to ensure that pages were properly working when signed in or not signed in. I wanted to ensure that there was a clear screen flow that led from one screen to another.

Test Cases:

Landing page(not signed in)->Sign in-> Sign up

home(signed in)->profile page->sign out->landing page

Profile page-> home-> Sign out

I would take differing routes through screens to ensure that the website followed this screen flow chart.
